

Last Defence (5.12d) 8 bolts, clip and go anchor

Climb the intro slab to the right side of the ledge and tackle a difficult boulder problem to gain a jug above the roof. Hold on and enjoy the ride to the anchors.

The Gerbil King (Open) 12 bolts, clip and go anchor

This long route climbs through multiple cruxes separated by rests. Tackle the roof via the obvious weakness through large underclings, thuggy! Technical climbing leads to the second roof boulder. One more roof stands between you and the chains.
