

The Alt Left - 335m, 5.12a (5.11b A0)
- 70m Rope
- 15 runners (8 short & 7 long)
- Single set cams (BD #.1 - #2)
- Double cams (BD #.4 - #1)
- Single set of Stoppers (extras of small sizes)

P11 35m, 5.8 - 12 bolts

P10 30m, 5.11b - 6 bolts
& gear

P9 30m 5.12a or 5.11b A0
11 bolts & gear

P8 30m, 5.11a - 7 bolts & gear

P7 30m, 5.10d - 8 bolts & gear (.3 & 5 BD)

P6 30m, 5.9 - 7 bolts

P5 35m, 5.9 - 8 bolts + gear

P4 35m, 5.10d - 14 bolts

P3 30m, 5.10c - 11 bolts

P2 20m, 5.8 - 5 bolts

P1 30m, 5.9 - 9 bolts
Best to link with P2

East End of Rundle (EEOR)
Approach as for True Grit, Geriatric,
Econoline.

Start ~ 5m left of lone tree at base of
wall and ~ 15m right of start of
Econoline. First bolt has a black hanger
and is ~8m above the ground.

⑤ 30m, 5.9 (7 bolts, no gear)

⑤ 35m, 5.9 (8 bolts + gear)

④ 35m, 10d (15 bolts, no gear)

10d

③ 30m, 10c (11 bolts, no gear)

② 20m, 5.9 (9 bolts, no gear)

① 30m, 5.9 (9 bolts, no gear)

BLACK HANGER

Start approx 15m right of Econoline and 5m left of lone spruce tree

⑩ 30m, 11b (6 bolts + gear)

technical stemming

wires

Trend left to find anchor after last bolt. There is an off-route anchor (studs with no hangers) straight up

From top of route, SCRAMBLE UP 100m TO DESCENT

⑪ 35m, 5.8 (12 bolts, no gear)

Caution off-route bolts without hangers.

⑨ 30m, 5.12a (5.10d A0) 11 bolts

BIG ROOF

gear crack

⑧ 30m, 11a/b (7 bolts + gear)

Small cams/nuts @ crux

⑦ 30m, 10d (9 bolts + gear)

SMALL STANCE

0.3 & 0.5 BD CAMS IN HORIZONTAL

The Alt-Left, 335m 5.12a (5.11b A0)
FA: Steve Holeczi, Marc Piché - Aug. 2017
FFA P.9: Simon Meis, Gery Unterasinger

GEAR - 70m ROPE
(CONSIDER TAG-LINE FOR HAULING UPPER ARCHES)
- 15 draws (8, SHORT, 7 LONG)
- SINGLE SET CAMS (BD# 1-#2)
- DOUBLE CAMS (BD# 4-#1)
- SMALL TO MED. NUTS

The Alt-Left, EEOR 5.12a (5.11b A0), 335m
FA: Marc Piché, Steve Holeczi Aug. 15, 2017
FFA P9: Simon Meis, Gery Unterasinger

Approach: Hike up as for True Grit, Geriatric, Econoline. Start ~5m left of a lone spruce tree at the base of the wall and ~15 m right of Econoline. The first bolt has a black hanger and is ~8m above the ground

P1 - 50m,5.9: Climb up on good rock with some delicate moves to a good ledge and anchor after 30m. Either belay here or preferably ascend another 20m (5.8) to a bolted anchor on a loose ledge.

P2 - 30m,5.10c: Move right on the ledge and crank up a few moves beside the crack. Stem up the corner feature then step left when possible. Great moves on solid stone above.

P3 - 35m,5.10d: Ascend an easy staircase with increasing difficulty into a shallow v groove. Technical climbing on superb rock for a few bolts leads to a ledge. Look for the secret left hand side pull to get over the overlap above.

P4 - 35m,5.9: Ascend easily up a right facing corner to a stemming crux on gear. Continue up easier terrain to a nice belay ledge (small rack to #2/nuts will suffice)

P5 - 30m,5.9: Step right and ascend a straightforward pitch to the belay where the wall steepens. From the top of this pitch retreat is straightforward with a 70m rope.

P6 - 30m,5.10d: Traverse up and right on slightly fractious rock past 7 bolts to a traverse finger rail. In a good horizontal, place a 0.3 and 0.5 bd cam before launching straight up past another 2 bolts and the hanging anchor.

P7 - 30m,5.11a/b: Climb straight up from the belay on steep and featured rock with bolts. Halfway up the pitch the character changes to a layback/ stemming gear corner (thin to mid sized gear), and a final bolt before moving out right to the belay. An amazing pitch.

P8 - 30m, 5.12a (5.10d A0): Technical stemming/ face climbing past 4 bolts leads to a step out left and a nice gear crack. Climb up this to a small undercling roof. Step back right (bolt) and up to a small crack leading to the big and wild roof. Currently the next 6 bolts are A0

P9 - 30m,5.11b: A spectacular pitch. Climb 5 bolts past finger jugs and an undercling section. After this transition into the technical stemming corner on gear and 1 bolt. A few metres above the bolt at a finger rail head right into a rest. Climb up past another bolt then step back left to a small belay stance. Note: there is a 2 bolt anchor (without hangers) higher in the corner which should not be used.

P10 - 35m,5.8: Head up left from the belay onto a slab of perfect rock to finish.

From the top anchor scramble about 100m up before accessing easier ground to meet up with the regular EEOR scramble route descent trail.
